

Hot Property : Looking for the right Architects?

Thailand architects.com

“The Successful Solution to Design and Architecture”

“If you are looking for a talented architect in Thailand to assist you in the design and architectural drawings of your home or construction project, you have come to the right place. We can help you every step of the way from initial design ideas, concepts, preliminary perspectives and 3D renders all the way through to full construction drawings. We cater for all types of property, styles and shapes. It is our goal to create fabulous designs, marvelous architecture whilst providing an excellent service for all our clients in Thailand and beyond.” **Architects at Thailand Architects.com**

Thailandarchitects.com is One of the Best I Have Seen

Once in a while you come across a first class web site. One that does exactly what the internet was created to do; Thailand Architects.com is one such site. Firstly it has some of the most beautiful photos of the Bangkok city skyline I have ever seen. Secondly they inform you in short but concise paragraphs exactly what the Architects can do and how they can help you. Then thirdly it gives you plenty of quality images of design works to look at. It is informative, quick and visually exciting. Finding a starting point to have any architectural works done is hard on the internet and thailandarchitects.com provides the solution. A wide range of gifted Thai architects are available to assist you with your project. The team has done some super designs from the very simple to the more sophisticated. They display a collection of some of their works in the gallery; which is plenty to confirm their excellent credentials as architects to talk to.

What You See is Often a Reflection of What You Can Expect!

Choosing the right people to do business with is actually easier than one would imagine, especially if you read the signs; it is common sense, that the way they present themselves to the public, is often a positive clue as to how they do business. There are many fantastic examples and Thailand Architects.com fits the profile. The presentation is exciting to the eye, sharp, clean and well thought out. So you can be sure you are going to get the perfect solution to your architectural needs.

So I Checked Them Out !

Thailandarchitects.com is the web site for a group of extremely talented Thai architects. Based in Bangkok their professional service takes them all over Thailand, as well as neighbouring countries such as Vietnam, Cambodia, Singapore, Hong Kong, China and the Middle East. They bring a welcome team of experts with both English and Thai speakers. They offer first class design at no frills prices, dependable advice and exciting designs. If you need an architect, I strongly suggest take a look at their web site. It is simple to contact them: Fill in the contact form and one of their team will get in touch. I received an e-mail reply within an hour of e-mailing !

Fair and Reasonable Price Policy

As someone who has used the services of architects I must say I am impressed. I very much like the simplicity of their approach as regards the stages and payment. They have broken it up into two simple stages: First the preliminary designs/concepts. The customer pays for this and each project is individually priced fairly and with regards the details/specifications required. They work closely with you either in meetings or via e-mail and do so until you are happy with the results. They make an allowance for a certain amount of changes which naturally occurs in any design process. Once you are happy they can then move on to full architectural construction drawings which they provide a proposal/fee for. If you are happy then they go ahead once first payment is received. Normal drawings of houses take anywhere from 6-16 weeks depending on the detail and what you require. Larger projects naturally can take longer but details and updates are provided. Their fees are extremely favourable to the customer and certainly lower than most.

If you are doing any form of construction project, whether it's a house, office or condo project you are going to need a licensed architect. You have to start with an architect and work closely with them to achieve your end results. It is paramount to get good solid advice and know you are being looked after. Thailandarchitects.com is in my books the best place to start.

What do they Design?

Basically almost any type of property you can imagine. They help with low cost housing, bungalows, luxury villas, hotels, resorts, spas, condo projects, shopping malls, factories, offices and public facilities. The choices are yours to make. If you require more information you can e-mail them direct at info@thailandarchitects.com. I am sure you will be very pleased with the results. Their portfolio of works is most impressive and they have helped many people successfully create wonderful designs. However you be the judge. Try them and see. Go to www.thailandarchitects.com and start that exciting new journey of discovery and design.
